

LeapTalent Level 3 End-point Assessment

The Streaming Wars

Scenario Demonstration — Pack Introduction

Difficulty: 3 of 5 — Intermediate

What this pack is

This is a practice Scenario Demonstration pack modelled on the City & Guilds 9665 Data Technician end-point assessment. It contains four parts: this introduction, the Scenario Demonstration brief, the data files, and a Learner Guide showing how the task can be approached and the results you should expect to reach.

What is being looked at

This scenario is Excel-function focused: it blends two clean data sets and then exercises a specific toolkit of lookup, conditional and aggregate functions, finishing with a Pivot Table and chart. The areas examined are:

Area examined	Where it appears
Importing and organising data into named sheets	Scenario 1, Task 1
Validating headers, keys and missing values	Scenario 1, Task 2
Blending two tables with a lookup (XLOOKUP)	Scenario 1, Task 3
Conditional logic (IF) to derive a category	Scenario 1, Task 4 (HighCost?)
Conditional aggregation (SUMIF, AVERAGEIF, AVERAGEIFS)	Scenario 2, Tasks 1–3
Summarising with a Pivot Table	Scenario 2, Task 4
Visualising with a Pivot Chart	Scenario 2, Task 5
Building a summary table and interpreting findings	Scenario 2, Task 6

Why this is rated 3 stars

The data is clean and the steps are clearly specified, which keeps the difficulty moderate. What lifts it to 3 stars is the breadth of distinct Excel functions a learner must apply correctly — XLOOKUP, IF, SUMIF, AVERAGEIF, AVERAGEIFS — plus a Pivot Table and chart, all of which must reference the right ranges and conditions. It is not higher because there are no data-quality traps and no open-ended analysis.

Areas to watch

- Blend with **XLOOKUP** on UserID — don't copy-paste columns, which misaligns if the sheets are sorted differently.
- The HighCost? rule is **strictly greater than £9** — a £9.00 subscription is "Standard".
- SUMIF/AVERAGEIF take the criterion in the middle: (range, criterion, sum/ avg range) — a common ordering mistake.
- **AVERAGEIFS** reverses the order: the average range comes *first*, then the criteria pairs.
- Label every chart and table for non-technical readers — it's explicitly assessed here.

What's in the pack

- **Scenario Demonstration – The Streaming Wars** (PDF) — the brief, in C&G format.
- **ViewingStats.csv** — viewing statistics per user.
- **UserProfiles.csv** — user profile attributes.
- **Annex A – Field Reference** — a data dictionary, embedded in the brief.
- **Learner Guide – The Streaming Wars** (PDF) — method and expected results.
